## Portfolio

<https://swarup-new-portfolio-k-k.netlify.app/>

## Experience

- Six month internship at Rego Digital Solutions Pvt. Ltd as a Frontend Developer intern.
- Three-month internship as a Frontend Intern with Salesqueen Software Solutions Chennai .

## Projects

### Sign language recognition using deep learning.

Sign language recognition systems aim to bridge the communication gap between deaf and hearing individuals. The main objective of this project is to create an accurate and efficient system that can recognize and interpret sign language gestures in real-time.
